**The 'WM Patient Tales' Wall**

With your help, are going to have a wall of patient tales, each of one sheet of A4 on display at the Forum. This means about 400 words, plus if possible, a favourite photo. Your tale should try to include your diagnosis, treatment, where treated, effects on you and family and problems encountered. A challenge in 400 words! If successful, we aim to put these tales on the WMUK website. There will be no personal details apart from a name (or even invent one!) If you would like to take part, just indicate here, and we will send you more details. ***I'd like to take part!***

To avoid duplication in mailings and to reduce postage costs we share registrant information with the IWMF office in Sarasota, Florida. If you do not want this, please let us know.
